

SharePoint Consulting Services: Empowering Business Collaboration

Nagarro can help you gain better control over content, streamline business processes and access and share information

Nagarro provides end-to-end SharePoint consulting services to companies with wide ranging requirements, from basic configuration and deployment of MOSS, to developing powerful, enterprise SharePoint portals which integrate with a number of disparate packaged and custom applications.

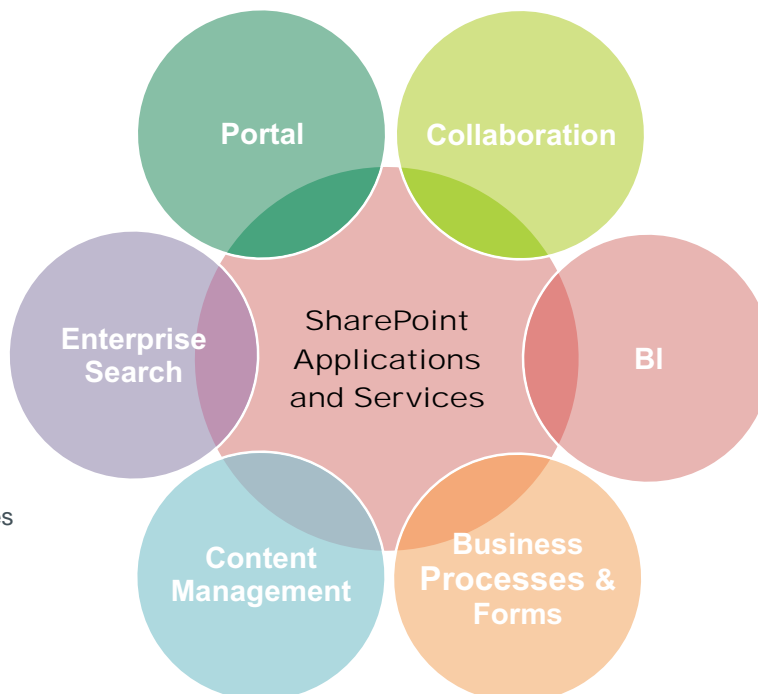

Our SharePoint consulting services include development, collaboration, search solutions, migration, application

integration, content management, and deployment. Our engineers also specialize in developing solutions that integrate with, or are entirely based on Windows SharePoint Services (WSS). For each of our solutions, we provide specific out-of-the-box configuration, as well as options for developing custom modules and parts for meeting specific business requirements.

SharePoint Consulting Services: Empowering Business Collaboration

Intranet Enterprise Portal Development

Developing portals and sites that enable enterprises to leverage SharePoint technology as to optimize their operations and decision making. Our services include:

- Scaling and managing enterprise portals for large organizations
- Integrating disparate systems into single, scalable solutions
- Knowledge base solutions through document repositories and SharePoint search

Extranet Consulting, Design and Deployment

Designing and implementing extranet sites using MOSS and WSS allow businesses to collaborate with external partners, vendors and customers. Our services include:

- Defining overall strategy and requirements
- Implementing security policies based on business needs
- Configuring forms based authentication for access
- Design, development and deployment of extranet portals
- Providing tools for easy administration.

Portals for Content Management, Organization, and Collaboration

Solutions that enable employees publish, manage and retrieve content quickly and securely. Collaboration solutions empower team collaboration and increased efficiency. Our services include:

- Configuring SharePoint sites that allow multi-dimensional organization of content allowing users to navigate or find content in multiple meaningful ways

- Providing control on delivery of content (including audience based targeting of specific content)
- Team sites, collaboration dashboards, best practices and team process repositories and workflow integration
- Organization wide document collaboration

Business Forms and Integration Services

Nagarro can help streamline business by rapidly and effectively implementing forms-based processes. Our services include:

- Design and publication of business forms using standard Web browsers or rich client applications such as Microsoft InfoPath
- Access control and user management
- Integration with structured systems including databases and other line of business applications

SharePoint Branding Services

Our experienced graphic design teams can provide visual customizations to provide a desired uniform experience to our SharePoint intranet or extranet sites. Our services include:

- Development of customized themes to meet branding objectives
- Implementation of style sheets, templates and definitions to provide the desired look and feel
- Administrative control for site managers to control personalization policies
