SAP add-on Nagarro Speed Advice

Speeding up the processing of advices and efficient handling of special cases

Do you receive large numbers of detailed electronic remittance advices of your customers, which ties up enormous capacity at your company to process, which is then unavailable for more qualified and strategic tasks? Are you also looking for ways to efficiently process your advices (differences, credit memos, adjustment charges), thereby minimizing manual entry activities and post-processing? Do you also need a solution that will allow you to standardize advice processing with third parties and/or inner-company processing?

All of the tasks named can be easily solved with the SAP add-on Nagarro Speed Advice.

Functional scope

The functions of the SAP add-on Nagarro Speed Advice are easy and intuitive to use:

- The advice items ready for post-processing are classified for the accountant and displayed in compressed form in separate tables (Balance 0 (optional), Gross difference, not found) and are supported with helpful functions as part of post-processing.
- The posting of the received payment is made using the SAP standard transaction F28. The complete advice is posted in a document.
- With the interfaces integrated in Nagarro Speed Advice, both the electronic remittance advices of the large store chains (groceries, building materials/DIY, electronics store), the purchasing associations and central regulators can be easily processed.
- Nagarro Speed Advice has an EDI converter integrated in SAP for incoming remittance advices (REMADV). The EDI mapping can be individually configured using customizing, which saves time and costs.

"

The implementation of the add-on from Nagarro ES results in time savings of around 100 hours per month.
Mr. Tetzlaff, director of accounts receivable, GROHE AG

The sustainable approach ensures high acceptance of the applications among the employees. Even employees who are skeptical at first are won over when the first cases are processed. The go-live is completed is just a few days both for Nagarro Speed Advice and for the Nagarro Dispute Case Management.

Joaquin Fernandez, director of accounting, Zentis GmbH & Co. KG

Without Speed Advice from Nagarro ES we would be in a jam right now.

Mr. Pojar, director of accounts receivable, Radeberger Gruppe KG

Scope with different formats

Nagarro Speed Advice can work easily with different file formats:

- Many electronically generated PDF advices can be converted to the Nagarro Speed Advice format with our integrated PDF converter.
- Nagarro Speed Advice offers a pre-defined Excel (.XLS, XLSX, .CSV) and text interface (.TXT) not only to process incoming payment advices but also inner-company advices.
- For companies that deliver their advices in special formats of HTML, XML, PDF, XLS or TXT, special interfaces were developed.
- Payment files from payment service providers can be processed by our solution.

Nagarro Speed Advice offers many other functions:

- Processing of invoice lists
- Account determination for conditions
- Automatic breakdown of conditions
- Automatic customer location using market or GLN numbers
- Credit-side processing of an advice or individual advice items
- Simulation of the posting transaction before the actual posting

Advantages at a glance

Nagarro Speed Advice helps companies with

Significant reduction of processing times and associated costs	Integrated EDI converter at no charge	Variable incoming interfaces, processing of electronic advice types and payment files	Quick implemenation, quick ROI	Processing of electronic PDF advices (without ORC)

Nagarro ES supports you in all phases of the Nagarro Speed Advice implementation, whether it is the implementation of the user training with organizational consulting and process optimization, the realization of additional interfaces or service and support in operation.
