

**Growth is limited
without a strong
foundation**

What is your company's foundation?

You define yourself by many things - but certainly not by your ERP. Let's be honest, this will probably not be the case in the future either. But ERP will provide your company with a strong foundation on which you can grow sustainably, stably and quickly. Because ERP is about the most important thing in your company: Cash.

With an ERP that maps all relevant processes as standard, you are in a position to:

Make decisions in real time - and even make predictions based on your data

Protect your business - through integrated risk mitigation scenarios and standard processes in line with legal regulations and sustainability

Increase your productivity through automation in financial processes

Make your financial status and liquidity forecast transparent and thus manage cost-efficient payments

Optimize your financial performance by reducing days sales outstanding

But ... does an ERP implementation require large internal IT expertise and a large budget?

No. At least not with Nagarro Kickstart Cloud ERP powered by SAP S/4HANA Cloud, Public Edition

Nagarro Kickstart Cloud ERP

With our package, within 8-10 weeks you will have a finance-based, running ERP system enabling you to write invoices and take your accounting to a professional level.

8-10

Weeks of implementation

20 %

Savings through automation options

Faster and more efficient financial closing

The ERP: SAP S/4HANA Cloud, Public Edition.

With Cloud ERP from SAP, you are optimally positioned. Benefit from standard processes for service companies, the robust financial core and automatic updates twice a year, directly in your system.

The technology platform: SAP BTP.

With the Business Technology Platform, you not only benefit from specific integrations, but are also set up for the future - if a function is not implemented in the standard, it can be realized via extensibility on the BTP.

The Add-on: SAP Analytics Cloud.

KickStart comes with SAP Analytics Cloud Essential Analytics Package, leveraging our unique expertise to enhance decision-making through clearer, faster, and real-time reporting. It simplifies complex Sales & Purchasing and Finance reports directly on the S/4HANA Cloud, Public Edition.

The implementation: Nagarro Baseline Activation.

Our implementation approach gets you into the cloud quickly and efficiently. We define your requirements together in workshops and then set up a functioning ERP system for you within 8-10 weeks. SAP can be so simple.

Great financial focus - but what else can an ERP do?

Admittedly, finances are not everything - even if they are rightly at the heart of the company and its success.

However, an ERP also covers the following areas:

Analysis and reporting

The SAP Analytics Cloud is a comprehensive solution for analyses and reporting that enables you to exploit the full potential of data from your business-critical applications - in real time. You can use embedded analytics to make operational data from your system transparent - depending on the package, you also receive users for the planning functionality.

Database and database management

With the multi-model database HANA, data is stored in your working memory instead of on a hard disk. HANA is able to carry out analyses in parallel and perform transaction processing at high speed. This allows you to process large amounts of data in near real time. SAP S/4HANA Cloud runs on SAP HANA.

Procurement

Automated sourcing and procurement management helps you to gain an overview of your company's flow of goods and services. With a centralized purchasing system and an automated accounts payable process directly in SAP S/4HANA Cloud, you can quickly increase efficiency and boost profits.

Sales

Integrated system intelligence allows you to quickly improve the performance of your sales team and collaboration with other units. The end-to-end process covers the entire lifecycle of a customer order from lead to cash - including quotation, order confirmation, delivery and invoicing.

Nagarro Kickstart Cloud ERP

Nagarro Finance-Led ERP Implementation (8–10 weeks)

After 10 weeks, you will have a fully operational AI Supported finance-led ERP and beautiful dashboards with a pre-defined scope, ready-to-use

About Nagarro

Nagarro's SAP division pools our expertise in business-critical applications and complex ERP landscapes. We advise our customers on their SAP IT strategy and processes, implement and support systems and always strive for a long-term business partnership.

In addition to extensive experience in cross-industry standard processes, we have specific know-how in the areas of retail, life sciences, manufacturing, utilities, energy, professional services and the public sector.

Our expertise is also certified: We are an SAP Gold Partner and Pinnacle Awards winner. Together with our clients, we also regularly participate in the prestigious SAP Quality Awards.

Due to our global approach, our SAP colleagues are spread all over the world, with delivery teams in Germany, Turkey, France, Romania, the USA, Mexico, Iberia and India.

Nagarro helps you future-proof your business by working with foresight, fluency and a CARING mentality. We excel in digital engineering and help our clients evolve into a people-centric, digitally-focused organization that increases their responsiveness, efficiency, familiarity, creativity and sustainability. Today, we are 18,000 experts in 36 countries, forming a nation of Nagarrians ready to help our clients succeed. Find more information: www.nagarro.com
