

Theory is good

practice is better!

Joining us as a working student or for a course of dual studies is therefore the perfect way to start your career. You will be an integral part of the team from day one. Together, we will work with the very latest technologies and products in a high-growth environment in which you will be able to grow personally, too.

The itinerary for your career at Nagarro

Dual studies

With a dual study course, you alternate between three-month periods of theory and practice. This allows you to directly apply what you learn and lay the foundations for your career start. Lectures given in small groups offer you optimum learning conditions and direct contact with the professors.

Working student placement

Why wait to qualify before working? Want to earn some money while you study and gain an initial impression of SAP consultancy? Right from the start, you will be able to realize your potential in the course of complex projects. It doesn't matter whether you are on a bachelor's or master's degree course – all you need is a window of at least six months.
