

# Re-engineer your digital DNA with Nagarro and low code

Across industries, technology is redefining the way business organizations function. As more and more organizations embrace this change and implement a digital shift, speedy and streamlined app development has become even more crucial.

As your digital partner in this journey, Nagarro aids your digital transition with our low code capabilities. We take a consulting approach to all low-code implementations and leverage our platform and integration expertise to deliver tangible business results.

## As your low code partner, Nagarro helps accelerate your digital transformation journey through

- A tailored approach for successful low code implementation and utilization
- Focused, flexible, and efficient low-code development
- Data-driven insights and value-driven approach for Maximizing ROI

## Our approach: We help you throughout the entire low code development cycle from start to finish

### Consulting

Creating a digital strategy and process blueprint, defining a roadmap, identifying and prioritizing use cases, and developing prototypes.

### Training

Comprehensive trainings featuring platform learning, mentorship, real-world use cases, dedicated support and online resources and community learning.

### Development

Enterprise app development with scalable team, agile collaboration, and global delivery with a value driven approach.

### Maintenance and Support

Comprehensive application and platform support with customization, global models, process rationalization, incident management, and continuous improvement.

## Some of the platforms we work with

# Accelerators

- Writing assistant
- Automation testing framework
- Map controls
- Centralized user management
- Social networks based SSO
- Bulk data uploaders
- Delegation management
- Dynamic forms
- Gantt chart
