

Hungry to get your testing to the next level?

1

- ☹️ "Oh no - all these fails, every single day..."
- ☺️ "We can focus on root causes!"

2

- ☹️ "Why do they keep changing things?"
- ☺️ "Our automation has an immune system."

3

- ☹️ "All in testing? That means huge amounts of data, right?"
- ☺️ "We already have all the data we need."

4

- ☹️ "Synthetic data is too much work, and production data is unpredictable and a legal problem."
- ☺️ "We know and use the patterns in our production data."

5

- ☹️ "What is our automated test suite doing, actually?"
- ☺️ "I can view our portfolio's structure at a single glance."

6

- ☹️ "We run everything, every single time. Better safe than sorry."
- ☺️ "We pick the right tests, for every change, every time."

7

- ☹️ "Nobody dares to touch legacy code."
- ☺️ "We know the risk our code carries."

8

- ☹️ "Model-based? We don't have time for that!"
- ☺️ "Models create themselves - and help us."

**Appetizing enough?
Bon appetite!**
